LANDSCAPING AND FENCING REQUIREMENTS

QUALICO[®]
communities

- **The City of Edmonton may have additional landscaping requirement over and above these requirements. For more information, please visit edmonton.ca/treeplantingrequirements**
- The intent of the landscaping requirements is to provide a consistent standard for the community while allowing the homeowner flexibility with their individual landscaping style
- Builders are responsible for doing the landscaping on all Townhome lots
- Front yard landscaping is to be completed within one year of the approved rough grade certificate date
- Inspections are weather dependent and will commence once plant material has come out of dormancy. Inspections will cease once the majority of plant material has gone into dormancy, (i.e. leaves are no longer on trees or shrubs)
- The accepted minimum standard is to consist of:
 1. Topsoil to be installed to a minimum depth of 4" for all front, side and rear yard areas, and
 2. SOD in the front yard from the front of the house to the curb or sidewalk (seed is not acceptable). Artificial Turf is permitted as long as material and installation are of high quality; and
 3. Additional plantings as noted in table below to be planted in the front yard:

Home Style	Deciduous Tree Number & Size		Coniferous Tree Number & Size		Shrubs Number & Size
Single Family - Front Garage	1 @ 1 3/4"	or	1 @ 6'	or	7 @ 24"
Single Family Zero Lot Line - Front Garage	1 @ 1 3/4"	or	1 @ 6'	or	3 @24"
Single Family Zero Lot Line - Rear Lane	1 @ 1 3/4"	or	1 @ 6'	or	3 @24"
Townhomes - Rear Lane	Builders are responsible for completing front yard landscaping				

Quick Tips

- **Deciduous Trees** are measured at 6" above ground and based on trunk width (caliper). Move aside any rocks/wood chips surrounding the base of the tree to allow for an accurate 6" measurement from the ground
- **Coniferous Trees** are: Fir, Larch, Pine or Spruce. These trees are measured by height. (columnar or pyramid cedars are considered shrubs)
- **Deciduous shrubs** are measured by height and Coniferous shrubs are measured by spread or height
- **Shrubs** are to be a **combination** of Deciduous and Coniferous and planted in a mounded shrub bed topped with mulch or landscaping rock. Perennials can be used in place of deciduous shrubs, and are measured by height. For example: Cedar, Juniper, Lily, Peony, Rose Bush = 5 shrubs - 2 are Coniferous, 2 are Perennial (which count as Deciduous) and 1 is Deciduous
- **Pie Lot Option:** Pie lots are not required to have Sod in the front yard, but are to have finishing landscaping material and **5 shrubs @ 24"** (combination of Deciduous and Coniferous)

Homeowners wishing to reduce water usage might consider a front yard that has been designed specifically for water conservation. We recommend that homeowners research trees and shrubs that are suited for Xeriscaping along with materials that help with drainage and evaporation.

- The following must be incorporated in front yard if Xeriscaping is being used:
 1. Mulch and Landscaping Rock (**black and grey rock will not be permitted as the primary hard landscaping material, consideration may be given for use as an accent only**); and
 2. Additional plants as noted in the table below to be planted in the front yard (planting in the swale area / driveway side will not be considered as part of the shrub count);

	Deciduous Tree Number & Size		Coniferous Tree Number & Size		Shrubs Number & Size
Option #1	1 @ 1 ^{3/4} "	or	1 @ 6'	&	10 @ 24"
Option #2	-	-	-	-	17 @ 24"

See "Quick Tips" on previous page for further information.

LANDSCAPING DEPOSITS AND RETURN PROCEDURE

- Homeowners are to contact their Builder once they have completed their front yard landscaping
- Please note that all plant material is to be the size stated above at time of inspection
- If landscaping fails and more than one (1) re-inspection is required, \$150.00 will be deducted from the deposit for each additional re-inspection
- Upon approval of the landscaping by Qualico, the landscaping deposit will be refunded to the Builder. It will be the Builder that issues the landscaping deposit to the homeowner
- If landscaping has not passed within 3 years of approved rough grade certificate, the landscaping deposit will be forfeited

- The Developer has supplied and installed permanent address plaque that must remain on the house and be visible from the street.
- Address plaques will be installed as shown below. If, for any reason, the address plaque cannot be installed in the primary location, an alternate location will be selected by the Developer.
- Address plaque will be a requirement of the landscaping inspection.

- Fencing is encouraged to be of a similar design and color to the fencing style established for the Developer. In some cases, chain link fencing may be specified by the City, County, Municipality or Town
- Where the Developer fencing at the rear of the lot is chain link, side yard fencing to be either chain link (no inserts) or wrought iron within 7 meters of the rear fence so as to not obstruct views on adjacent lots
- The following fencing styles / materials are permitted in Riverview
 1. Wood Screen – TBD
 2. Chain Link - Black
 3. Wrought Iron – Black
 4. Vinyl – Homeowners are strongly encouraged to avoid solid white vinyl fencing with preference given to more wood like colors.
- Zero Lot Line – Front Garage and Zero Lot Line - Rear Lane lots have restricted fencing see below for Fence and Gate Guidelines and Diagrams for important information

FENCING AND GATE GUIDELINES

Your property is located in an area which is structured for zero lot line or streetscape home construction. This means that houses and garages may be built on or near the property line. In order to build structures on or near the property line, and to access the side of the structures that are located on or near the property line, a lot owner must have access over their neighbour’s lot. This access is protected by an easement, registered on your Certificate of Title, which allows you to access your neighbour’s lands, and allows your neighbour to access your land, to facilitate zero lot line construction on the terms stated in the Easement.

The short definition of an easement – is the right to use property, or a portion thereof, of another for a specified purpose (i.e. Drainage, eaves, fence) Under this Easement, you are not allowed to erect structures or improvements, such as fences, which interfere with your neighbour’s rights over the Easement portion on your property. If you build a fence on your lot, we recommend you follow these guidelines to reduce the chance of liability from neighbouring land owners, and to protect your fence from damage.

- **We recommend that you do not erect a fence on your property until your neighbour has finished building on its lot.** Your neighbour will have the right to move your fence to enlarge their build zone, to access their property, and for the other reasons stated in the Easement. This may cause damage to your fence
- **Do not build a fence in a location which would prevent your neighbour from exercising its rights under the Easement.** If you prevent access, you may be liable for interfering with the rights granted in the Easement, and may be required to remove the fence, alter the fence, or pay damages
- **If you build a fence in a location that may prevent your neighbour from exercising its rights under the Easement, we recommend that you install a gate in a location that allows direct access to the easement area.** Your neighbour will still have the right to move your fence, if necessary, for the reasons stated in the Easement, but a gate will allow them ease of access. This will reduce the likelihood that they will need to move your fence
- **Do not install locks on any gates. Latches are acceptable, but the neighbour must have free access to use them.** A lock will prevent access. You may be liable for interfering with the rights granted in the Easement, and may be required to remove the fence, alter the fence, remove the lock, or pay damages

The attached diagrams illustrates a few potential fence and gate locations which you may consider. This diagrams are for illustrative purposes only. Any variations should comply with the above guidelines and registered easement.

Zero Lot Line EASEMENT

With Front Attached Garage

Gates may have latches but shall not be locked.

It is not recommended to erect a fence until the neighbouring house is built.

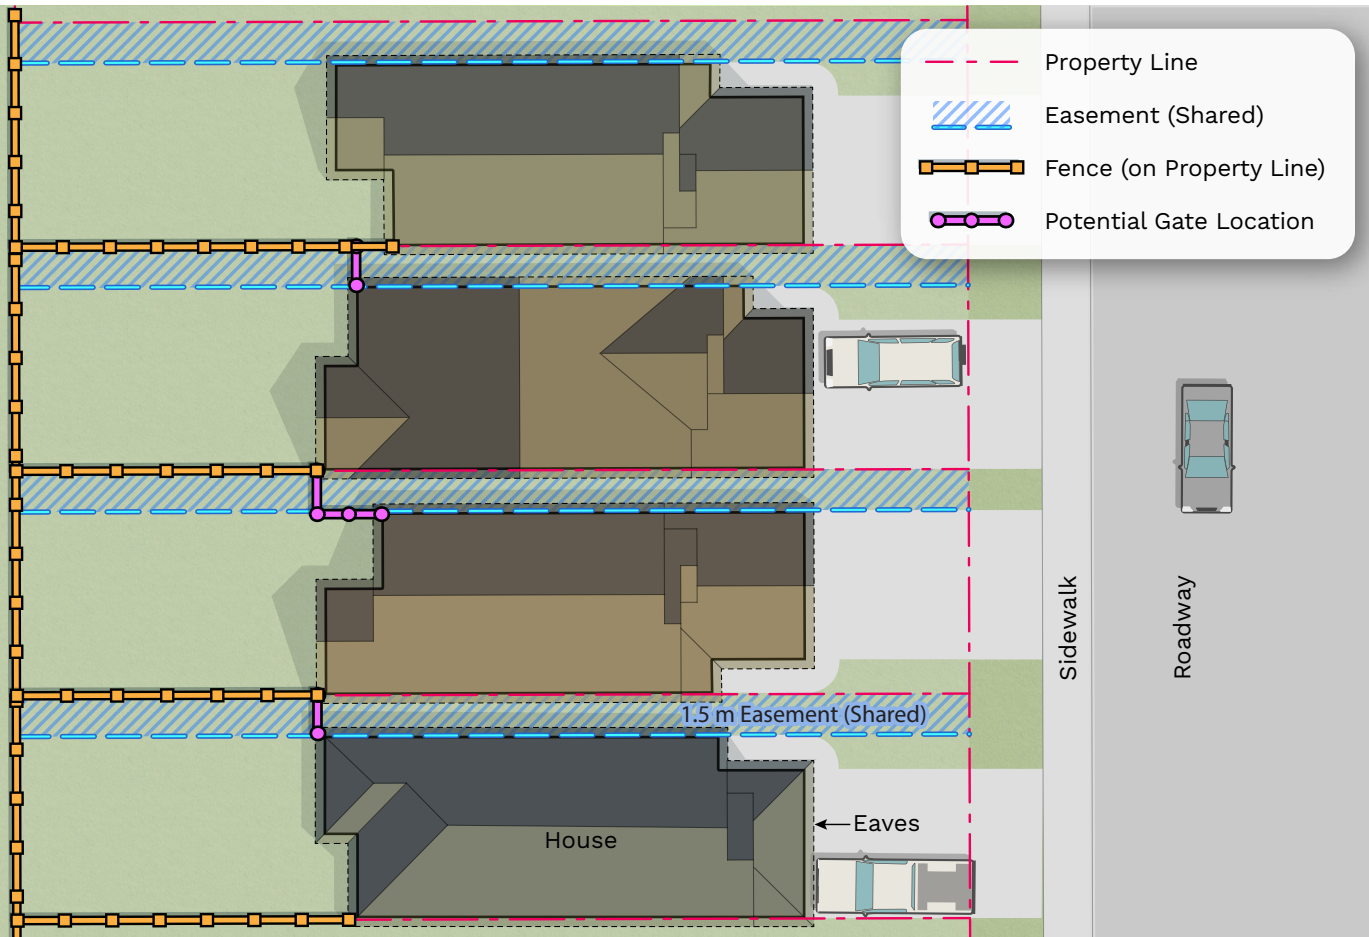

Potential Gate

Gates should be located such that each neighbour can access the entire side of their buildings (i.e. at the back of the house).

Neighbouring house and fence built on **property line**.

1.5 m Easement (Shared)

Property Line

Lot, building and fence configurations on the above diagrams are shown for illustrative purposes only. Please refer to the municipal **Land Use Bylaw** for development and setback regulations.

Zero Lot Line EASEMENT

Considerations

Your property is located in an area which is structured for Zero Lot Line home construction. This means that houses and garages may be built on or near the property line.

What does this mean for the homeowner?

- 1 Cost saving:** As a buyer, you benefit by being able to build the same size home on a smaller lot. Zero Lot Line lots are as deep as a standard lot which ensures your dollar is maximized by paying for the more functional land at the front and rear, rather than the additional side yard.
- 2 Registered easement:** With one side of the home on the property line, permission is needed to maintain and access the side of the home that is only accessible via the neighbour's side yard. To handle this, the developer registers a maintenance access easement. The short definition of an easement is the right to use property, or a portion thereof, of another for specified purpose (ie. Drainage, maintenance eaves, fence)
- 3 Ownership:** There is a 1.5m easement on both sides of your home. One is on your property and the other is on the neighbour's. While you own your property, the easement grants your neighbour access to that portion of your property. Similarly, the easement on your neighbour's property grants access to you.
- 4 Access for maintenance:** The easement grants you access to your neighbour's lot to maintain your house or garage without having to ask permission. You can temporarily bring in items, like ladders, to conduct maintenance but it cannot be stored in the area.
- 5 Restrictions:** Access to the easement must not be obstructed. Side yards are to be free of anything and everything to allow neighbour access. Air conditioners, general storage, sheds, decks, bins, hose-reels, landscaping (other than ground cover) or other items are not allowed within the easement. Tools to conduct maintenance may be brought into the area but cannot be stored (ie. Ladders)
- 6 Fencing:** To maintain unobstructed access, a fence cannot be built across the easement. Fences can only be built within the rear yard, and it is recommended you wait until construction on your neighbour's home is complete to avoid conflict. A gate may be installed, but to ensure access, must not be locked. See reverse side for a diagram on fence and gate placement. If access is obstructed, you may be liable for interfering with the rights granted in the easement and you may be required to remove or alter the fence or pay damages.
- 7 Communication is key:** The first step as a Zero Lot Line homeowner is understanding the easement registered to your land title. This will ensure that you know your rights and responsibilities and can easily avoid or resolve conflict.
